Objectives

I am seeking a dynamic and challenging professional environment that will enhance my skills as a Java Developer. I am committed to continuous learning and adapting to reach my full potential in a dynamic work environment.

Education

Ae Kalsekar College <i>Bsc It</i>	2019 – 2023 Thane, India
Assad-ullah khan College <i>12th</i>	2017 – 2019 Thane, India
Mohammad Mushtak Ahamd High School <i>10th</i>	2017 Aurangabad, India

Technical Skills

Languages: Java, JavaScript, SQL

Backend: Core Java, Spring Boot, Hibernate, JDBC, Servlets

Frontend: HTML, CSS, React

Databases: MySQL

Tools: Git, GitHub, Postman, Maven Concepts: OOP, REST APIs, CRUD Operations

Projects

Rental Management System | Java, Spring Boot, [React/Angular/Vue], MySQL

- Developed a full-stack application for managing rental assets, bookings, and customer data.
- Built a RESTful API using Spring Boot to handle reservation logic, availability checking, and pricing calculations.
- Designed a responsive frontend interface allowing users to browse inventory, book items, and view rental history.
- Implemented secure user authentication and role-based access control (Admin vs. User).

InteliTaskAI – AI-Powered Task Management Backend | Java, Spring Boot, Spring Security, JWT, REST API, JPA/Hibernate, MySQL, Maven, Docker

- Developed a Spring Boot RESTful backend application for task management with secure authentication and authorization.
- Implemented JWT-based authentication using Spring Security for login, signup, and role-based access control.
- Designed and exposed REST APIs for user and task management following layered architecture.
- Used Spring Data JPA (Hibernate) for database operations with MySQL.

Certificates

- Completed Full stack Java developer certification course
